# PSCR Overview

---

The Public Safety Communications Research (PSCR) Division is housed within the Communications Technology Laboratory (CTL) at the National Institute of Standards and Technology (NIST)

PSCR is the primary federal laboratory conducting research, development, testing, and evaluation for public safety communications technologies

NIST

# PSCR Innovation Accelerator Program

---

- Section 6303 of the Middle Class Tax Relief and Job Creation Act of 2012 provides \$300M to NIST to perform R&D critical to the success of a dedicated, nationwide LTE broadband network (FirstNet). NIST will focus the funding provided from the Public Safety Trust Fund on the following critical areas:
  - Development of broadband requirements, standards, technologies, and applications for public safety, including:
    - Mission Critical Voice over LTE
    - Land Mobile Radio (LMR) to LTE integration and eventual migration
  - Addressing R&D necessary for critical features identified by public safety entities beyond current generation of broadband technology, including:
    - Location-Based Services, Data Analytics, and Device Usability/User Interface
  - **Launch an open innovation program, consisting of contract awards, grants, and competitive research funding and prizes to address some of the highest priority public safety R&D needs**

# PSIAP Grant Program

- In December 2016 PSCR released a Notice of Federal Funding Opportunity that covers a broad range of research and development objectives across many technical areas
- Grants are available for research, advanced engineering, and product development
- Academic and industrial researchers (in both technology and human/social areas), public safety agencies, and product or system developers are all potential awardees
- The Notice of Funding Opportunities identifies the following focus areas that will drive R&D for the Innovation Accelerator
  - Mission Critical Voice
  - Location-Based Services
  - Public Safety Analytics
  - Public Safety Communications Demand Model
  - Research & Prototyping Platforms
  - Resilient Systems

For more information on the FFO and full rules and guidelines, please visit [Grants.gov](https://www.Grants.gov)  
The NIST Innovation Accelerator Program opportunity number is 2017-NIST-PSIAP-01

### Agency Info

Welcome to PSCR's prize page. We are the public safety communications research division of NIST and our office develops the technology standards for devices and systems that are used by 60,000 agencies and 5 million first responders.

Starting summer of 2016, we invite you to participate in prize competitions to drive innovation and advances in the following areas:

1. Location Based Services (LBS)
2. Land Mobile Radio (LMR) transition to → Long Term Evolution (LTE)
3. Mission-Critical Voice
4. User Interface/User Experience (UI/UX)
5. Data Analytics

We will even have some video and creative competitions to tell the stories of why these technologies are critically important to the 320 million Americans who need timely and effective responses to emergencies and disasters.

The programs will continue over the next five years, so check back often or register here at Challenge.gov and we'll keep you posted on the latest launches, news, and winners.

- ✓ Solve mission-centric problems in Public Safety Communications Technologies and set goals for future innovation.
- ✓ Engage broadly and openly, including entrepreneurs, inventors, start-ups, experts, academics, and industry.
- ✓ Measure and report impact.

# Defining Open Innovation

*“No matter who you are, most of the smartest people work for someone else.”* ~Bill Joy, co-founder Sun Microsystems

- Define a problem to be solved or a goal to be reached.
- Participation is open to anyone,\* regardless of credentials, experience, connections, or past performance.
- The solver has the flexibility to be creative and innovative in how they get to the solution.

# How We Work in Open Innovation

## Tools

- Crowdsourcing
- Citizen Science
- Collaborative Innovation

## Forms

- Hack-a-thons
- Data Jams
- Prize Competitions

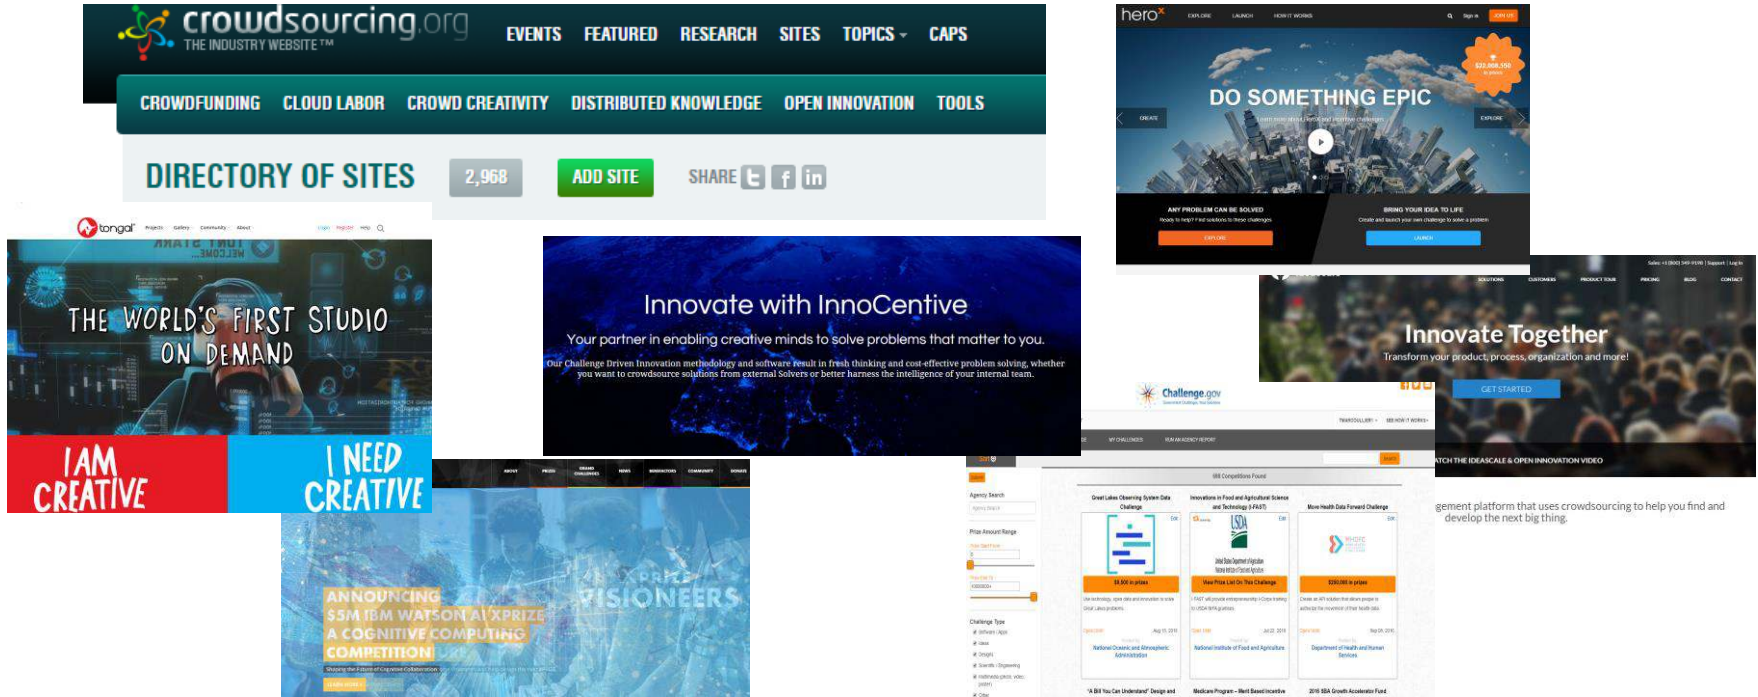

# History of Prize Competitions/Challenges

Competitions have been around for hundreds of years:

- England's Longitude Prize of 1714 that sought to develop an accurate method of calculating longitude at sea.
- Napoleon's food preservation prize competition resulting in canning.
- The 1927 Orteig Prize, the transatlantic flight that made Charles Lindbergh famous.

# Crowdsourcing Across Industry

bit.ly/PSprizes

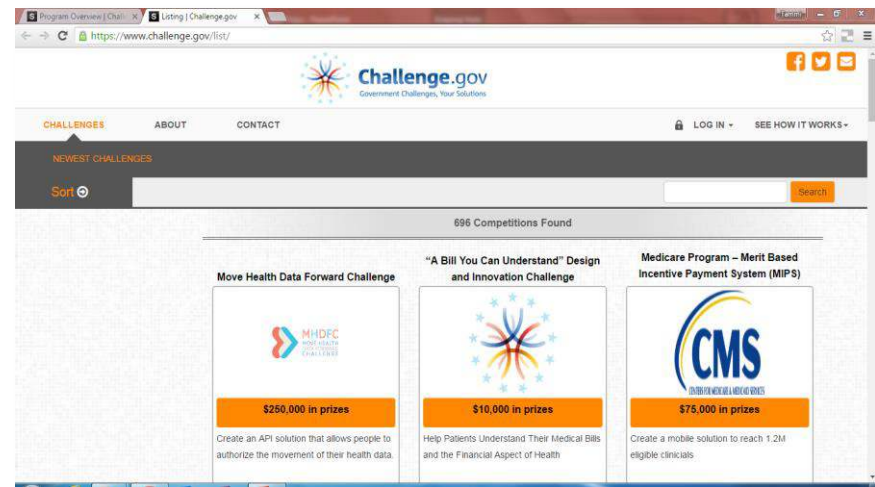

# Prizes & Challenges in Federal Government

## Benefits:

- **Attract** new and diverse talent
- **Discover** new concepts and techniques
- **Stimulate** the marketplace
- **Accelerate** the timeline for innovation

## Precedent for Success:

- **960+** competitions since Sept. 2010
- **98** agencies launched programs
- **\$250+** million in prizes offered
- **400,000+** solvers engaged

# Prizes & Challenges in Federal Government

---

- Desalinization - **USAID**
- Lunar Lander - **NASA**
- Sun Shot Catalyst – **Energy**
- Ultra High Speed Apps –**Justice**
- Robocalls – **U.S. Trade Commission**

Success Stories: <https://www.challenge.gov/success-stories/>

# NIST: Head Health Challenge III

**Seeking advanced materials  
with improved impact  
resistance**

- **125** Abstracts
- **21** Full Proposals with Material Samples
- **5** First Round Winners were awarded \$250,000 each
- December 2016: Grand Prize Winner **\$500,000**

# PSCR Open Innovation: 5 Key Areas

---

- Mission Critical Voice

- Location Based Services

- LMR to LTE

- UI/UX

- Analytics

# NIST Benefits

Prizes and challenges advance our mission, by:

- Forging new partnerships
- Advancing the state of science and technology
- Disseminating NIST products
- Increasing awareness about NIST

# Public Benefits To Participation:

---

- Winning a prize and valuable incentive
- Access to peers & experts
- Exposure to business opportunities and VC funding
- Labs and testing facilities
- Access to grants and cooperative agreements
- Future collaboration and partnerships

# How To Get Involved:

---

- Share suggestions for problems to solve
- Follow the prize page at **bit.ly/PSprizes**
- Partner with people and companies to bring solutions
- Sign up for PSCR's Quarterly Newsletter

# Upcoming Events & Publications

---

- PSCR's annual Public Safety Broadband Stakeholder Meeting
  - June 12-14, 2017
  - San Antonio Marriott Riverwalk, San Antonio TX
- *Public Safety Analytics Summit Report* (February 2017)
- *Public Safety Enhanced User Interface Technology Roadmap* (Spring 2017)
- Enhanced User Interface Summit (Spring/Summer 2017)
- *Public Safety Mission Critical Broadband Report* (Summer 2017)

# Public Safety Innovation Accelerator

---

**THANK YOU!**

YOU are the key to success in solving these mission-critical problems and YOU have **the intelligence, capabilities, and brilliance** to drive the innovative leaps.
