The Evolution of Safety

First of all…

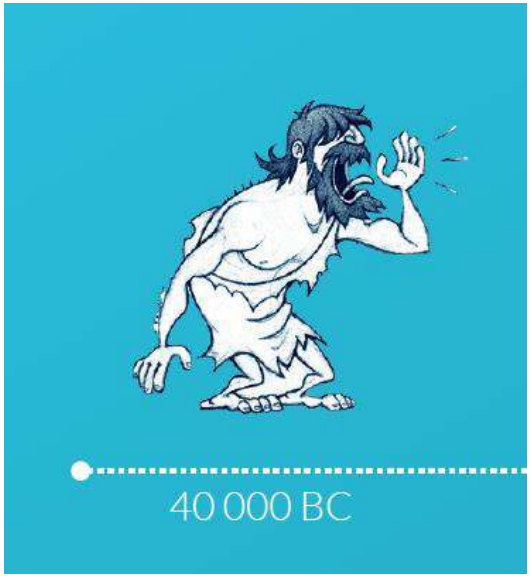
- Thanks
- Full Disclosure…
- Staying true to the mission
- Same team! Same Goals!

#YeahApps!

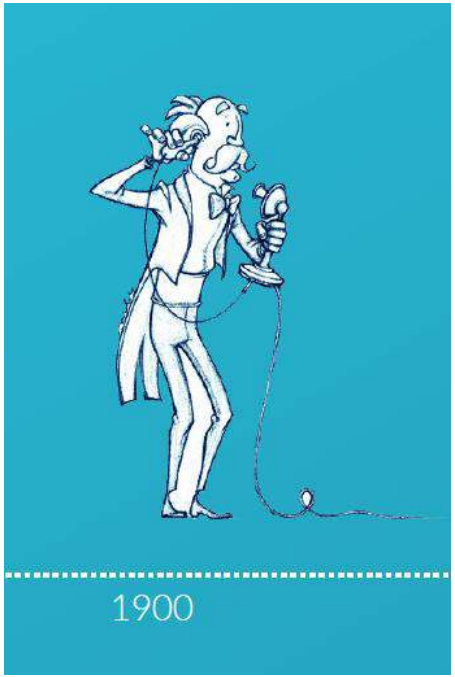
Evolution of Safety?

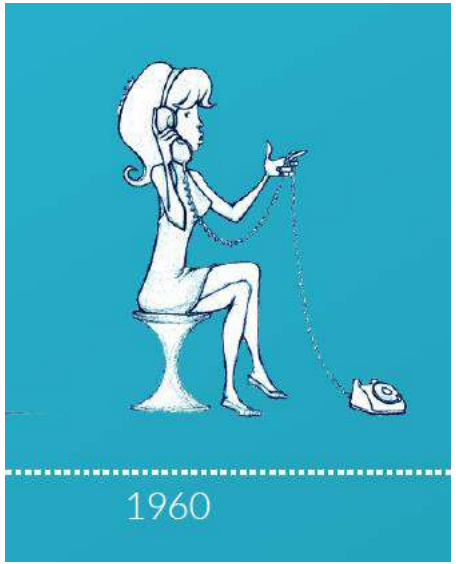
- How has calling for help changed or improved over the years?
- What changes are coming in the near future?
- What is possible in the long term?

HELP!!!

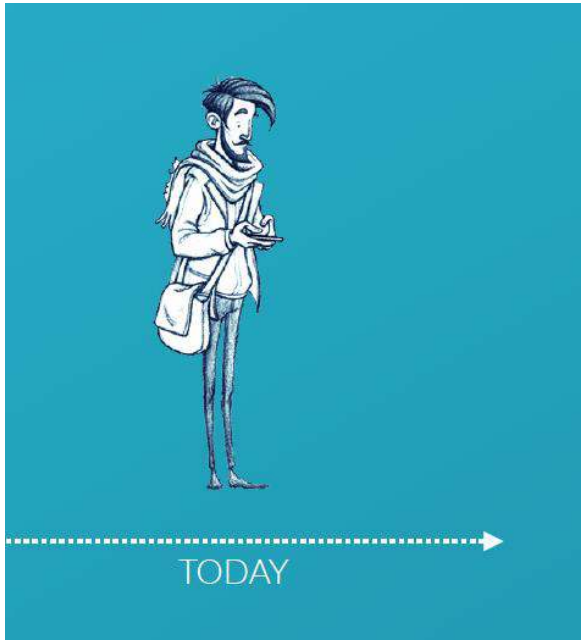


“Mr. Watson, come here, I want to see you.”

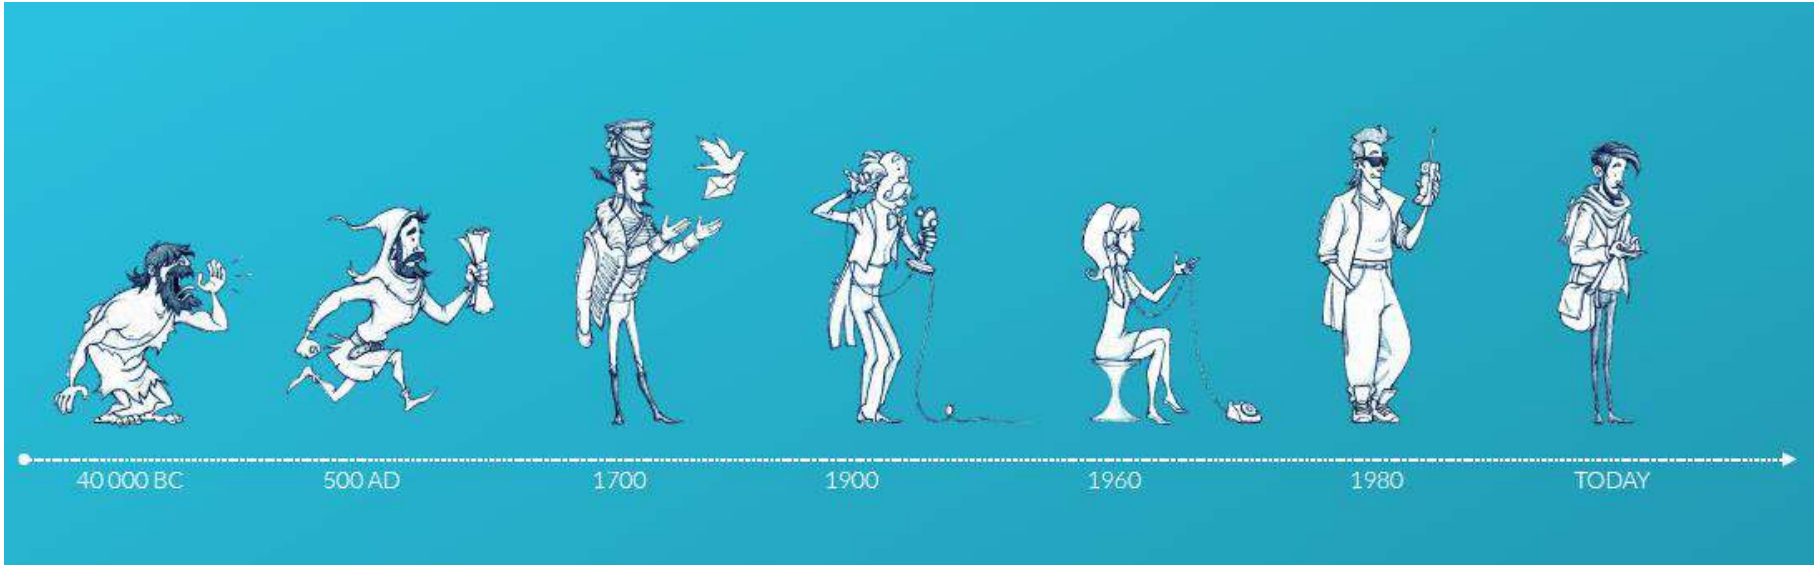




Can you hear me now?



- Tons of logistical challenges
- Complicated physical interaction
- Amazing capabilities



40 000 BC
500 AD
1700
1900
1960
1980
TODAY

So how can Tech help?

- Improve the ability of someone being able to call for help for themselves
- Improve the data collection
- Improve the transfer of that information

Continuum of a distress event

- Discomfort
- Request for “possible” help
- Need for help
- Call for help
- Dispatch resources

What's next?

- Data sharing not data owning
- Sensor based alerts
- Collecting data for incidents
- Digital data can be scrubbed with ai
